PROFILE

I am a web developer and software engineer. I am experienced with working on an Agile team with daily Scrum meetings and have worked well with project managers. I've practiced extensively with programming languages such as C++ and JavaScript and have experience with web design components such as CSS, HTML, React, and Vue. I also have worked thoroughly in penetration testing and cybersecurity. I am a new graduate from the University of Florida with a degree in Computer Science.

EMPLOYMENT HISTORY

Web Designer , Let's Design Your Site   Remote
Apr 2022 — Dec 2022

Worked as a web designer for business owners in need. Based on their vision I put together end-user ready websites. Some of the skills needed for this position are:

- Web Design
- SEO
- Client Relations
- Inter-Team Communications

Freelance Web Developer, JH Darbie & Co.   Remote
Jan 2023 — Present

Created a company website by working directly with the clients on what they wanted to achieve. Worked as a solo developer and managed all of the infrastructure, communications, and actual development of the website.

- Client Relations
- Web Development
- Time Management
- Communication

EDUCATION

Bachelors of Science in Computer Science, University of Florida   Gainesville
May 2019 — May 2023

3.5 GPA
